The COMPANY

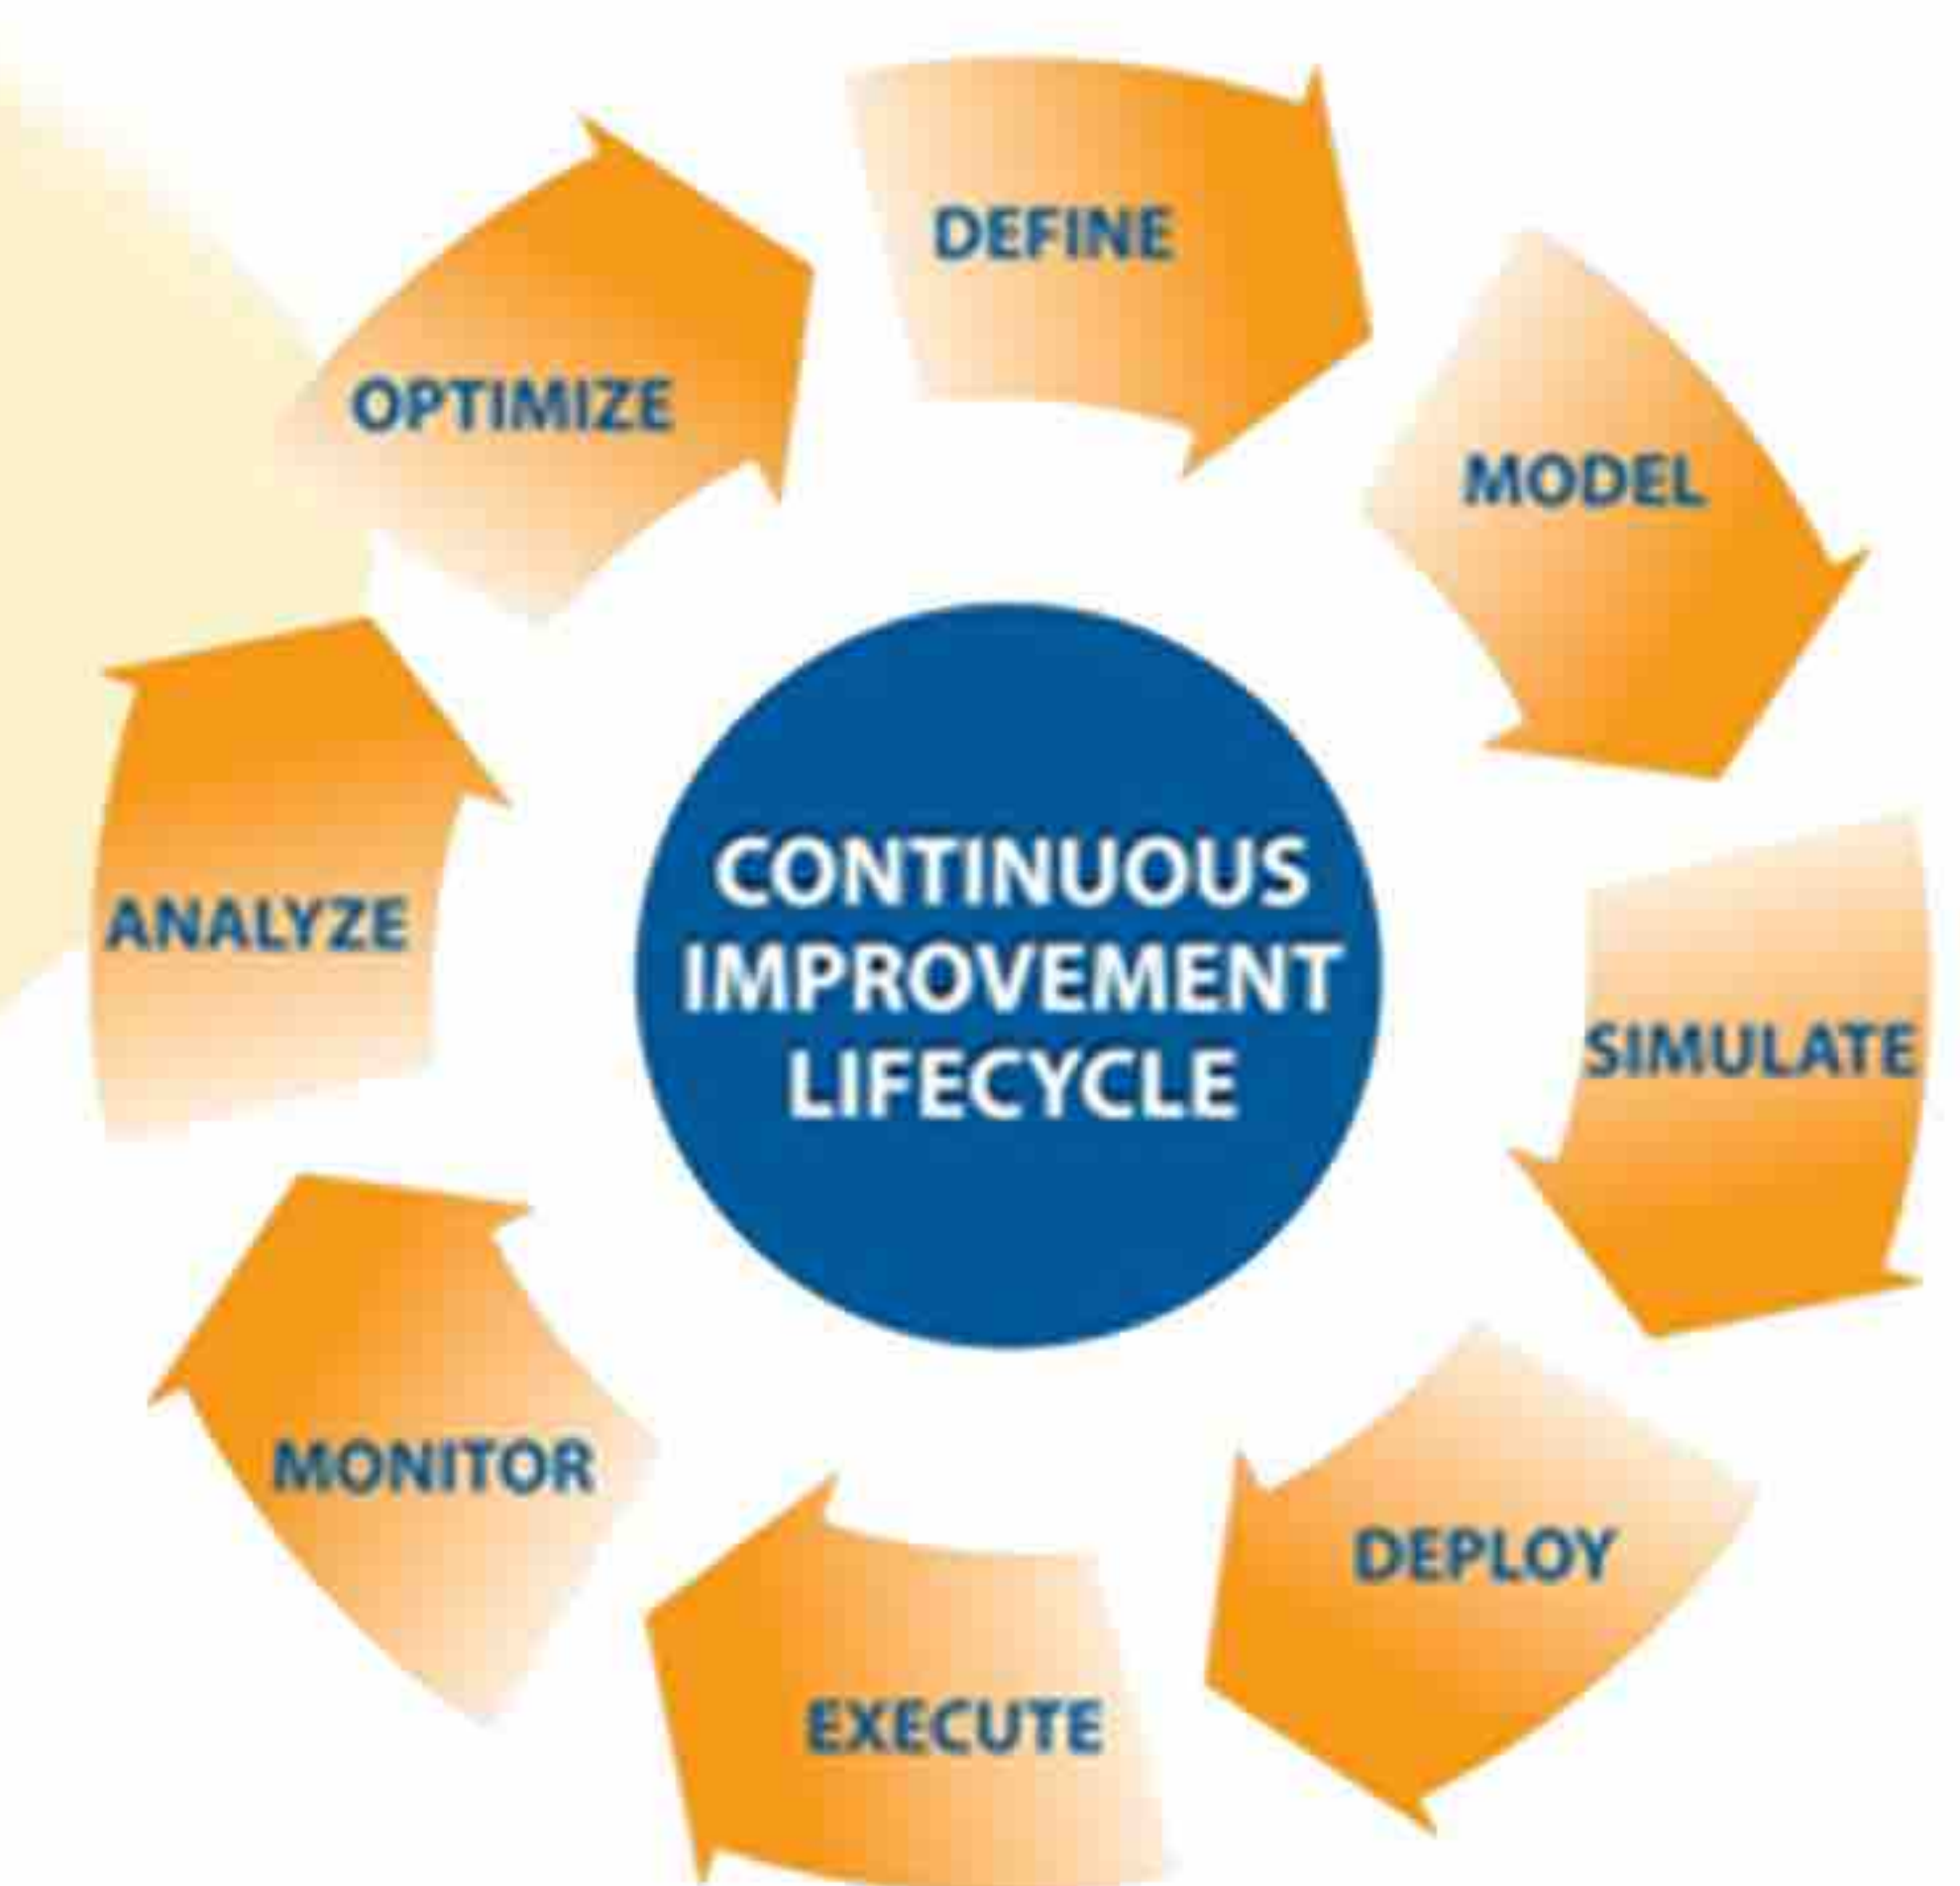

Nexcel Computer Solutions is an IT solutions provider dedicated to helping small and medium businesses in maximizing the benefit from their IT investment. Nexcel is a young and fast developing company which was formed by experienced and qualified IT professionals. Since its establishment, Nexcel has achieved staggering amount of success, recognition and trust of many prestigious clients in the Kingdom of Bahrain, built on professionalism, hard work and integrity.

Nexcel staff is experienced in providing IT solutions and support to the private and public sectors like Government bodies, including Universities & schools, libraries, hotels and estate agents. Nexcel Computers is going from strength to strength because of its professional & friendly services.

Enhanced technology requires advanced expertise and mechanism SMB and SME businesses often face greater technology challenges than larger corporations. These organizations need increasingly efficient and integrated systems if they are to thrive in today's ever demanding economy. The range of skills and depth of experience, needed to support these vital application services, databases and operating systems, that underpin your business can be a significant financial and resource burden.

Nexcel Computer Solutions provides quality IT solutions to SME: Small and Medium Enterprises all over Bahrain. Our broad and diversified experience allows us to provide a comprehensive set of support & consultancy services, which are tailored specifically to meet the growing requirements of the SME market. Nexcel Computer Solutions can help you realize the benefits of a highly skilled in-house IT department without the extortionate expense. Nexcel Computer Solutions will enable your business to access a professional and dependable IT support service; enabling you to benefit from our specialist expertise at fraction of the cost of a dedicated in-house resource.

We ASPIRE to IMPROVE
YOUR BUSINESS
Performance 

Our TEAM

Nexcel staff holds industry-recognized certifications. They have developed a broad range of expertise and have a breadth of experience in helping our clients implement enterprise class network services, such as emails, centralized file storage, backup, remote access to email and files, web sites and all other aspects of IT that a small business needs.

Our CORPORATE SERVICES

SUPPORT & CONSULTANCY SERVICES

We see support as a proactive service that includes offering regular visits to check your systems and rectify any issues before they become a problem, keeping your business running at optimum efficiency. Support is offered through either general support agreements or our Support-As-You-Go service. Our Network & Systems Consultants work closely with the support team throughout the project life cycle to ensure a seamless transition as the system is handed over.

We see support as a proactive service that includes offering regular visits to check your systems and rectify any issues before they become a problem, keeping your business running at optimum efficiency.
